

Department:--Mechanical
Academic Year—2013-14
Final Year Project List

SN	Name of Project
1	Design & Development of regenerative breaking system for automobile application
2	Design of power cartridges and closed vessels & its Analysis
3	Structural steel skid frame Durability & Analysis by FEA
4	Gravity Bicycle with gravity energy flywheel & shock E enhancer
5	Development of finned tube heat exchanger
6	Polygon sheet metal cutting machine with Indexer
7	Vibration Analysis of cracked cantilever beam by Experimental & FEA
8	Design & Testing of unmanned ground Vehicle
9	Design & Manufacture of vertical axis wind turbine
10	Intelligent Anti theft system for Automobiles using GPS
